

This memo serves to request for USD funded Econet SIM card for use in testing the Smart WI-FI Ecocash USD wallet functionality. The purpose of this request is for enabling the developers to conduct extensive testing and ensuring the compatibility of our Smart WI-FI application. The availability of a dedicated SIM card will significantly enhance our ability to deliver a high quality product to our customers.

Based on the conducted research and analysis, we recommend obtaining an Econet SIM card with budget allocation of at least USD 200 .This allocation will allow us to acquire a SIM card offering broad coverage, flexibility and the necessary features to simulate real-world network environment for comprehensive testing of the Smart WI-FI.

Your assistance is of paramount importance towards the success of the project.
